

INTERNATIONAL MASTER COURSE ON AGING SCIENCE

IMCAS

21ST ANNUAL WORLD CONGRESS • JAN 31 to FEB 2, 2019 • PARIS

SHARK TANK

PLASTIC SURGERY - DERMATOLOGY - AESTHETIC SCIENCE

START UP CONTEST

FEBRUARY 1, 2019

9 AM TO 12:30 PM

PARIS

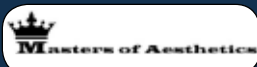

FOSTERING INNOVATION AND ENTREPRENEURS

After a successful inaugural IMCAS Shark Tank that took place in February 2018, this 2nd edition will give up-and-coming start-ups the chance to pitch their innovations of tomorrow in dermatology, plastic surgery and aesthetic science.

A jury of venture capitalists, industry leaders, physicians and inventors will have the difficult task of choosing this year's winners!

Come to this unique event to discover the next big thing!

IN COLLABORATION WITH

REPORT FROM 2018 EDITION

THE IMCAS INNOVATIONS AWARDS WERE GRANTED TO THE FOLLOWING THREE PROJECTS :

1ST PLACE

PB&B

PB&B (Plastic Biotech & Bioengineering) is a Life Sciences startup developing a novel filler and body remodeling injection, which enhances adipocyte and fat tissue volume with fatty acids. Based in Switzerland and Silicon Valley, PB&B will launch the first clinical testing of the product by the end of 2018.

2ND PLACE

LA JOLLA NANO MEDICAL

La Jolla NanoMedical is developing a Smart Therapy to non-surgically eradicate non-melanoma skin cancers. The therapy should meet the unmet medical needs of compromised older patients (non-surgical) and younger patients (cosmetic) seeking a scarless therapy. The therapy has completed very successful preclinical efficacy testing.

3RD PLACE

DAMAE MEDICAL

Non-melanoma skin cancer is the most common form of cancer worldwide. While rarely deadly, non-melanoma skin cancers can become disfiguring if allowed to progress without treatment. With the development of OCTAV®, a hand-held imaging device based on its proprietary technology, DAMAE Medical aims to revolutionize skin cancer surgical and treatment planning.

PRESENTING START-UPS:

AMONG 27 APPLICANTS

ESSENCE

Joli360 by ESI, novel part of Essence group, is an innovative breakthrough in facial skincare and beauty solutions, bringing professional, personalized facial treatments into the home. JOLI360 uniquely combines all the benefits of cutting-edge technology and IoT with Big Data and Swiss formulated cosmetics, enabling 24/7 access to leading dermatologist advice.

IMPLITE

Implite Ltd's ESSENTIALTM implant is the first immediate aesthetic solution for cancer related partial breast excision and reconstruction. With this family of implants the surgeon will be able to excise cancer and reconstruct the breast in just one procedure, and it will reduce overall healthcare expenditure for breast surgery.

IRISIOME

Irisiome develops machines for dermatological applications, based on the integration of a tunable laser. This has the advantage of delivering ultra-short pulses (picoseconds) with a high-repetition rate, thus reducing the global treatment time and increasing efficiency. Irisiome contributes to more safety, health and comfort for practitioners and patients.

QUANTIFICARE

With a portable 3D photography system, the LifeViz® Body, a 360° image of the body is obtained which allows comparison of pre-post interventions, simulation and quantification. The use of 3D images can improve the physician's technique, increase patient satisfaction and increase complementary procedures.

RHAMNOPHARMA

Rhamnopharma is seeking to license out an injectable treatment for aesthetic indications, including body contouring and cellulite, which has been extremely well tolerated and efficacious in preclinical studies. An oral drug has shown significant improvement in two models of nonalcoholic steatohepatitis (NASH) and in a diet-induced obesity and insulin resistance study.

SCIENTIS PHARMA

Scientis Pharma is a Swiss biotech company, dedicated to skin pigmentation. Our lead compound is cysteamine. Natural thiol biosynthesized in human cells cysteamine regulates melanin synthesis in skin. For the first time, cysteamine is applied in a topical depigmenting treatment: Cysteamine Cream®.

JURY MEMBERS

ALBRECHT Stefan
Chief Scientific Officer, Merz Pharma
MD, PhD Clinical Pharmacology
Germany

ANTUNES Humberto
Partner, Gore Range Capital
Former CEO of Nestlé Skin Health
and of Galderma
Switzerland

BEDDINGFIELD Frederick
Dermatologist
Founder & CEO, Sienna Biopharma
Former Chief Medical Officer of Kythera
USA

DAYAN Steven
Facial Plastic Surgeon
Founder & Principal Investigator,
DeNova Research
USA

DE BEER Doris
Managing Director, TSK Laboratory
Netherlands

DRILL Craig
Founder & President,
Portfolio Manager, Craig Drill Capital
USA

ECKHOUSE Shimon
Chairman, Alon MedTech Ventures
Inventor of IPL technology
Founder and Former CEO of Syneron
Israel

MANSTEIN Dieter
Dermatologist
Co-inventor of Fractional Photothermolysis
(Fraxel) and
Selective Cryolipolysis (CoolSculpting)
USA

MEHTA Rahul
Vice President R&D,
SkinMedica, an Allergan Company
PhD Pharmaceutical Sciences
USA

MORDON Serge
Director, INSERM ONCOTHAÏ
PhD & MBA
Finland Distinguished Professor
France
